## Handout

Photoshop for Web Design  
Lesson 3 - Step 4  
Barin Cristian Doru

## Designing testimonials

For the thumbnail:

- Once again create square inside square.
- Add a picture above it
- Use `Ctrl+Alt+G`.
- Add a grey stroke to the outer square (`#D9D9D9`).
- Add the title.
- Add some dummy text.
- Adjust the height spacing.
- Add the name of the person and city.
- Add another grey line at the bottom.
- Group it.
- Copy it two times.
- Select them all and hit Distribute Vertical Centers to have the same space between them.
- Change the pictures and the titles so it will look better.
- Make the pictures black and white with an adjustment layer.
- To make sure the whole design doesn't become black and white, group the thumbnail layers, and add the adjustment to that folder with `Ctrl+Alt+G`.

### WHAT PEOPLE SAY ABOUT US

**This is an amazing theme! I totally love it...**

Praesent id enim id tellus viverra aliquet. Curabitur vehicula sem elit. Phasellus faucibus, nisi ut imperdi dapibus, felis enim imperdiet nisi, et tempus massa tellus ac nulla. Mauris sed tellus purus. Integer cursus pretium est, in rhoncus leo pulvinar faucibus.

## Designing twitter feed and company information

Make the Twitter feed using the same techniques:

- Use IconFinder for the icon.
- Add some dummy texts, but with some links inside.
- Adjust the height spacing if needed.

Same goes for the company information, so try that yourself.

## Designing about us, services and latest news areas

The about us, services we offer, and latest news require the same techniques as before.
