

## Slice up the sidebar if need be

Slicing up the sidebar is just like the header and footer. Our theme's homepage does not have a sidebar but the blog template does so we will use that one. There are no WordPress functions that we would need inside the sidebar file.

Enter the following code in sidebar.php:

```
<div class="col-lg-4">
  <aside class="right-sidebar">
    <div class="widget">
      <form class="form-search">
        <input class="form-control" type="text" placeholder="Search..">
      </form>
    </div>
    <div class="widget">
      <h5 class="widgetheading">Categories</h5>
      <ul class="cat">
        <li><i class="icon-angle-right"></i><a href="#">Web design</a><span> (20)</span></li>
        <li><i class="icon-angle-right"></i><a href="#">Online business</a><span> (11)</span></li>
        <li><i class="icon-angle-right"></i><a href="#">Marketing strategy</a><span> (9)</span></li>
        <li><i class="icon-angle-right"></i><a href="#">Technology</a><span> (12)</span></li>
        <li><i class="icon-angle-right"></i><a href="#">About finance</a><span> (18)</span></li>
      </ul>
    </div>
    <div class="widget">
      <h5 class="widgetheading">Latest posts</h5>
      <ul class="recent">
        <li>
          
          <h6><a href="#">Lorem ipsum dolor sit</a></h6>
          <p>
            Mazim alienum appellantur eu cu ullum officiis pro pri
          </p>
        </li>
        <li>
          <a href="#">
          <h6><a href="#">Maiorum ponderum eum</a></h6>
        </li>
      </ul>
    </div>
  </aside>
</div>
```

```

        <p>
            Mazim alienum appellantur eu cu ullum officiis pro pri
        </p>
    </li>
    <li>
        <a href="#"><a href="#">Et mei iusto dolorum</a></h6>
        <p>
            Mazim alienum appellantur eu cu ullum officiis pro pri
        </p>
    </li>
</ul>
</div>
<div class="widget">
    <h5 class="widgetheading">Popular tags</h5>
    <ul class="tags">
        <li><a href="#">Web design</a></li>
        <li><a href="#">Trends</a></li>
        <li><a href="#">Technology</a></li>
        <li><a href="#">Internet</a></li>
        <li><a href="#">Tutorial</a></li>
        <li><a href="#">Development</a></li>
    </ul>
</div>
</aside>
</div>

```

There is not much else we need to do here until a later time we can add widgets to the sidebar area.
