Introduction to Less
Lesson 4 - Step 4
Sandy Ludosky

Introduction

So now we're going to style the "Our Services" section.

Styling Service section

We're going to be using the *mixins.less* file inside of which I have declared a group of code under the namespace `commonRules`.

Go ahead and apply it to the `#work` section while changing the background as well:

```
#work {  
  #commonRules;  
  background: @light;  
}
```

And that's it - refresh the page and observe a result. That was a good demonstration that with Less you can do a lot of things by writing much less code.
