

Next, we are going to style the footer of our website.

First, use Font Awesome icons in the footer, so tweak index.html file:

```
<footer class="page-footer">
  <div class="site-width ma">
    <div class="grid">

      <div class="footer-module footer-module--call-me grid-lg--4">
        <div class="footer-module__icon">
          <i class="fa fa-mobile" aria-hidden="true"></i>
        </div>
        <div class="footer-module__content">
          <h2 class="footer-module__title">Call Me</h2>
          <p class="footer-module__text">
            +55 41 3333-3333
            <br>
            +55 41 999-999-999
          </p>
        </div>
      </div>

      <div class="footer-module footer-module--address grid-lg--4">
        <div class="footer-module__icon">
          <i class="fa fa-map-marker" aria-hidden="true"></i>
        </div>
        <div class="footer-module__content">
          <h2 class="footer-module__title">Address</h2>
          <p class="footer-module__text">
            50 Portfolio Street
            <br>
            Curitiba, PR, Brazil
          </p>
        </div>
      </div>

      <div class="footer-module footer-module--email grid-lg--4">
        <div class="footer-module__icon">
          <i class="fa fa-envelope" aria-hidden="true"></i>
```

```

        </div>
        <div class="footer-module__content">
            <h2 class="footer-module__title">Send me an email</h2>
            <p class="footer-module__text">
                <a href="mailto:me@myportfolio.com">me@myportfolio.com</a>
            </p>
        </div>
    </div>

</div> <!-- .grid -->
</div> <!-- .site-width -->
</footer>

```

Introduce two helper classes without BEM inside the `*base/_helper_classes.scss*` file:

```

.ma {
    margin-left: auto;
    margin-right: auto;
}

.site-width {
    max-width: $site-width;
}

```

Lastly, add styles to the `*structure/_footer.scss*` file:

```

//
//-- Footer
//

.page-footer {
    background: #dcdcdc;
    padding: em(100) 1.5em;
}

.footer-module {
    margin-bottom: 2em;
    font-size: em(14);

    &:last-child {
        margin-bottom: 0;
    }
}

.footer-module__icon, .footer-module__content {
    display: inline-block;
    vertical-align: top;
}

```

```

.footer-module__icon {
    background: $color-base-light;
    width: rem(87);
    height: rem(87);
    border-radius: 100%;
    position: relative;
    font-size: em(45);
    color: #FFF;

    .fa {
        @include vertical-center;
    }
}

.footer-module__content {
    color: #4d4d4d;
    margin-left: 2em;

    a {
        color: inherit;
        @include hover-underline;
    }
}

.footer-module__title {
    text-transform: uppercase;
    font-weight: bold;
    margin-bottom: 1em;
    font-size: 1em;
}

```
