Now that we have the main structural elements in place, let's code the page content. There are five sections in total:
Welcome, Services, Portfolio, Blog, and Contact.

We'll start from the top with the Welcome section. This one is very simple. We just have a centered title with two font
sizes:

```html
<section class="welcome section">
    <h1 class="welcome__title">
        Welcome
        <span class="welcome__title-complement">
            to my Personal Portfolio
        </span>
    </h1>
</section>
```

Next, services:

```html
<section class="services section" id="services">
        <h2 class="services__title section__title">Services</h2>
        <p class="services__intro-text section__intro-text">
            Lorem ipsum dolor sit amet, consectetur adipisicing elit.
        </p>

        <ul class="services__list">
            <li class="services__item services--1">
                <div class="services__item-icon"></div>
                <h3 class="services__item-title">
                    Best Service
                </h3>
                <p class="services__item-description">
                    Lorem ipsum dolor sit amet, consectetur adipisicing elit. Optio at vel, incidu
                </p>
            </li>
            <li class="services__item services--2">
                <div class="services__item-icon"></div>
                <h3 class="services__item-title">
                    Best Service
                </h3>
                <p class="services__item-description">
                    Lorem ipsum dolor sit amet, consectetur adipisicing elit. Optio at vel, incidu
```

```html
                </p>
            </li>
            <li class="services__item services--3">
                <div class="services__item-icon"></div>
                <h3 class="services__item-title">
                    Best Service
                </h3>
                <p class="services__item-description">
                    Lorem ipsum dolor sit amet, consectetur adipisicing elit. Optio at vel, incidu
                </p>
            </li>
            <li class="services__item services--4">
                <div class="services__item-icon"></div>
                <h3 class="services__item-title">
                    Best Service
                </h3>
                <p class="services__item-description">
                    Lorem ipsum dolor sit amet, consectetur adipisicing elit. Optio at vel, incidu
                </p>
            </li>
            <li class="services__item services--5">
                <div class="services__item-icon"></div>
                <h3 class="services__item-title">
                    Best Service
                </h3>
                <p class="services__item-description">
                    Lorem ipsum dolor sit amet, consectetur adipisicing elit. Optio at vel, incidu
                </p>
            </li>
            <li class="services__item services--6">
                <div class="services__item-icon"></div>
                <h3 class="services__item-title">
                    Best Service
                </h3>
                <p class="services__item-description">
                    Lorem ipsum dolor sit amet, consectetur adipisicing elit. Optio at vel, incidu
                </p>
            </li>
        </ul>
</section>
```

The next section is the portfolio:

```html
<section class="portfolio section" id="portfolio">
    <h2 class="portfolio__title section__title">Portfolio</h2>
    <p class="portfolio__intro-text section__intro-text">
        Lorem ipsum dolor sit amet, consectetur adipisicing elit.
    </p>
```

```html
<div class="portfolio__nav-column">
    <ul class="portfolio__nav">
        <li class="portfolio__nav-li">
            <a class="portfolio__nav-item is-active" href="#">All</a>
        </li>
        <li class="portfolio__nav-li">
            <a class="portfolio__nav-item" href="#">Print</a>
        </li>
        <li class="portfolio__nav-li">
            <a class="portfolio__nav-item" href="#">Editorial</a>
        </li>
        <li class="portfolio__nav-li">
            <a class="portfolio__nav-item" href="#">Web</a>
        </li>
        <li class="portfolio__nav-li">
            <a class="portfolio__nav-item" href="#">Logo</a>
        </li>
    </ul>
</div>

<div class="portfolio__list-column">
    <ul class="portfolio__list">
        <li>
            <a class="portfolio__item" href="#">
                <img src="images/portfolio_thumb.jpg" alt="Thumbnail for [portfolio entry]
            </a>
        </li>
        <li>
            <a class="portfolio__item" href="#">
                <img src="images/portfolio_thumb.jpg" alt="Thumbnail for [portfolio entry]
            </a>
        </li>
        <li>
            <a class="portfolio__item" href="#">
                <img src="images/portfolio_thumb.jpg" alt="Thumbnail for [portfolio entry]
            </a>
        </li>
        <li>
            <a class="portfolio__item" href="#">
                <img src="images/portfolio_thumb.jpg" alt="Thumbnail for [portfolio entry]
            </a>
        </li>
        <li>
            <a class="portfolio__item" href="#">
                <img src="images/portfolio_thumb.jpg" alt="Thumbnail for [portfolio entry]
            </a>
```

```
                </li>
                <li>
                    <a class="portfolio__item" href="#">
                        <img src="images/portfolio_thumb.jpg" alt="Thumbnail for [portfolio entry]
                    </a>
                </li>
            </ul>
        </div>
</section>
```

Here for the "All" link I am taking one idea from SMACSS methodology and use a class called `is-active`. This way, we can easily select it when coding the CSS.

Next up is the blog section:

```
<section class="blog section" id="blog">
        <h2 class="blog__title section__title">Blog</h2>
        <p class="blog__intro-text section__intro-text">
            Lorem ipsum dolor sit amet, consectetur adipisicing elit.
        </p>

        <ul class="blog__list">
            <li class="blog__item">
                <div class="blog__item-image-container">
                    <a href="#">
                        <img src="images/post_thumb.jpg" alt="Thumbnail for [post title]">
                    </a>
                </div>
                <header class="blog__item-header">
                    <span class="blog__item-tags">
                        <a class="blog__item-tag" href="#">General</a>
                    </span>
                    <h3 class="blog__item-title">
                        <a href="#">Lorem Ipsum</a>
                    </h3>
                </header>
                <div class="blog__item-excerpt">
                    <p>
                        Lorem ipsum dolor sit amet, consectetur adipisicing elit. Neque quod sit
                    </p>
                    <a href="#" class="blog__item-read">Read more</a>
                </div>
            </li>
            <li class="blog__item">
                <div class="blog__item-image-container">
                    <a href="#">
                        <img src="images/post_thumb.jpg" alt="Thumbnail for [post title]">
                    </a>
```

```html
            </div>
            <header class="blog__item-header">
                <span class="blog__item-tags">
                    <a class="blog__item-tag" href="#">General</a>
                </span>
                <h3 class="blog__item-title">
                    <a href="#">Lorem Ipsum</a>
                </h3>
            </header>
            <div class="blog__item-excerpt">
                <p>
                    Lorem ipsum dolor sit amet, consectetur adipisicing elit. Neque quod sit
                </p>
                <a href="#" class="blog__item-read">Read more</a>
            </div>
        </li>
        <li class="blog__item">
            <div class="blog__item-image-container">
                <a href="#">
                    <img src="images/post_thumb.jpg" alt="Thumbnail for [post title]">
                </a>
            </div>
            <header class="blog__item-header">
                <span class="blog__item-tags">
                    <a class="blog__item-tag" href="#">General</a>
                </span>
                <h3 class="blog__item-title">
                    <a href="#">Lorem Ipsum</a>
                </h3>
            </header>
            <div class="blog__item-excerpt">
                <p>
                    Lorem ipsum dolor sit amet, consectetur adipisicing elit. Neque quod sit
                </p>
                <a href="#" class="blog__item-read">Read more</a>
            </div>
        </li>
    </ul>
</section>
```

Next, contacts:

```html
<section class="contact section" id="contact">
    <h2 class="contact__title section__title">Contact Me</h2>
    <p class="contact__intro-text section__intro-text">
        Lorem ipsum dolor sit amet, consectetur adipisicing elit.
    </p>
```

```html
<form action="#" class="contact-form">
    <div class="contact-form__container">
        <label class="contact-form__label" for="contact-form__name">Name</label>
        <input type="text" name="name" class="contact-form__field" id="contact-form__name"
    </div>
    <div class="contact-form__container">
        <label class="contact-form__label" for="contact-form__phone">Phone</label>
        <input type="tel" name="phone" class="contact-form__field" id="contact-form__phone
    </div>
    <div class="contact-form__container">
        <label class="contact-form__label" for="contact-form__email">Email</label>
        <input type="email" name="email" class="contact-form__field" id="contact-form__ema
    </div>
    <div class="contact-form__container">
        <label class="contact-form__label" for="contact-form__message">Message</label>
        <textarea name="message" class="contact-form__field contact-form__field--message"
    </div>

    <button class="contact-form__button">
        Send Message
    </button>
</form>
</section>
```

And lastly the footer:

```html
<footer class="page-footer">
    <div class="footer-module footer-module--call-me">
        <div class="footer-module__icon"></div>
        <div class="footer-module__content">
            <h2 class="footer-module__title">Call Me</h2>
            <p class="footer-module__text">
                +55 41 3333-3333
                <br>
                +55 41 999-999-999
            </p>
        </div>
    </div>

    <div class="footer-module footer-module--address">
        <div class="footer-module__icon"></div>
        <div class="footer-module__content">
            <h2 class="footer-module__title">Address</h2>
            <p class="footer-module__text">
                50 Portfolio Street
                <br>
                Curitiba, PR, Brazil
            </p>
```

```html
                </div>
            </div>

        <div class="footer-module footer-module--email">
            <div class="footer-module__icon"></div>
            <div class="footer-module__content">
                <h2 class="footer-module__title">Send me an email</h2>
                <p class="footer-module__text">
                    <a href="mailto:me@myportfolio.com">me@myportfolio.com</a>
                </p>
            </div>
        </div>
</footer>
```
