Slicing up the footer

Slicing up the footer is very similiar to slicing up the header. We want to get the bottom portion of html and add the WordPress functions needed.

So after looking through our template you could section out the footer like so:

```
<footer>
    <div class="container">
        <div class="row">
            <div class="col-lg-3">
                <div class="widget">
                    <h5 class="widgetheading">Get in touch with us</h5>
                    <address>
                    <strong>Moderna company Inc</strong><br>
                     Modernbuilding suite V124, AB 01<br>
                     Someplace 16425 Earth </address>
                    <p>
                        <i class="icon-phone"></i> (123) 456-7890 - (123) 555-7891 <br>
                        <i class="icon-envelope-alt"></i> email@domainname.com
                    </p>
                </div>
            </div>
            <div class="col-lg-3">
                <div class="widget">
                    <h5 class="widgetheading">Pages</h5>
                    <ul class="link-list">
                        <li><a href="#">Press release</a></li>
                        <li><a href="#">Terms and conditions</a></li>
                        <li><a href="#">Privacy policy</a></li>
                        <li><a href="#">Career center</a></li>
                        <li><a href="#">Contact us</a></li>
                    </ul>
                </div>
            </div>
            <div class="col-lg-3">
                <div class="widget">
```

```html
                <h5 class="widgetheading">Latest posts</h5>
                <ul class="link-list">
                    <li><a href="#">Lorem ipsum dolor sit amet, consectetur adipiscing elit.</
                    <li><a href="#">Pellentesque et pulvinar enim. Quisque at tempor ligula</a
                    <li><a href="#">Natus error sit voluptatem accusantium doloremque</a></li:
                </ul>
            </div>
        </div>
        <div class="col-lg-3">
            <div class="widget">
                <h5 class="widgetheading">Flickr photostream</h5>
                <div class="flickr_badge">
                    <script type="text/javascript" src="https://www.flickr.com/badge_code_v2.g
                </div>
                <div class="clear">
                </div>
            </div>
        </div>
    </div>
</div>
<div id="sub-footer">
    <div class="container">
        <div class="row">
            <div class="col-lg-6">
                <div class="copyright">
